A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded gray. The other three quadrants (top-right, bottom-left, and bottom-right) are white.

A 2x2 grid with red lines. The grid is formed by three horizontal lines and three vertical lines, creating four equal squares. The lines are red and the background is white.

A blank coordinate grid with a thick black border and a red crosshair. The grid is divided into four quadrants by a horizontal red line and a vertical red line. The top-right quadrant is shaded light gray. The grid is intended for plotting a graph.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains a small red dot in the center. The bottom-left square contains a small red dot in the center. The bottom-right square contains a small red dot in the center.

A square divided into four equal quadrants by a horizontal red line and a vertical red line.

A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, and the bottom-right quadrant is shaded light red. The other two quadrants are white.

A square divided into four equal quadrants by a horizontal red line and a vertical red line.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains a small red dot in the center. The bottom-left square contains a small red dot in the center. The bottom-right square contains a small red dot in the center.

A 2x2 grid with red lines. The grid is formed by a horizontal red line and a vertical red line intersecting at the center. The lines are thin and red, set against a white background. The grid is used for writing the answers to the questions.

A square divided into four equal quadrants by a horizontal red line and a vertical red line.
